Funai Corporation, Inc. Exhibits the Latest in Smart Home Entertainment at CES 2019 with New Philips and Magnavox Televisions

LAS VEGAS, January 4, 2019 – Funai Corporation, Inc. will exhibit its leading display technologies at CES 2019 with the all-new Philips 4K UHD Android TV Series, the award-winning Philips 24” Kitchen Android TV and the new Magnavox 4K UHD Roku TV. All of the latest smart home technologies from Funai and partner brands will be on display at the Funai pavilion in the Renaissance Hotel in Las Vegas, NV, January 8-11, 2019.

Funai’s commitment to innovation and strong strategic partnerships drives new product development, resulting in industry leading products for home entertainment. With each new product, Funai demonstrates its knowledge and expertise in the televisions and smart home market by addressing the consumer demands for convenience, content and streaming.

The latest smart home technologies in the Funai pavilion at CES 2019 will include:

Philips 4K UHD Android TV

The Philips 4K UHD Android TV delivers the most technologically advanced viewing experience with Android 8.0 providing access to the latest streaming channels and personalized recommendations from popular streaming apps including Netflix, VUDU, YouTube and thousands of additional apps including HULU, SlingTV, YouTube TV and Games available on Google Play. The Philips 4K UHD Android TV will be available in two different series (the 5704 and 5904) and with display sizes ranging from 43” to 75”.

Both the 5704 and 5904 Philips 4K UHD Android TV series are equipped with a Bluetooth near-field mic remote for voice control with the Google Assistant built-in, allowing users to search for content, ask every day questions and control smart devices, such as the Philips Hue Play, Nest thermostat as well as other Google Assistant compatible products. With Chromecast Built-in™, users can wirelessly mirror photos, movies, apps and more directly from their smartphone. The built-in Google Assistant is ready to control all smart home devices.

The Philips 4K UHD Android TV series features HDR 10 and is equipped with Bright Pro, a backlight boost that brightens the image by up to ten percent compared to standard LED displays, delivering exceptional brightness and contrast even in brightly lit rooms.

The 5704-series is now available in select retailers and warehouse clubs. Coming in the second half of 2019, the 5904-series will include an integrated far-field microphone solution allowing users to simply say, “Hey Google,” to activate their personal Google Assistant and ask

questions, control other smart home devices and add products to their Google Express cart from anywhere in the room.

Philips 24" Kitchen Android TV

The Philips 24" Kitchen Android TV with the Google Assistant is one of the first-of-its-class televisions designed for the heart of every home — the kitchen. The Android TV platform paired with the integrated far-field, echo-cancelling microphone gives users voice-activated access to the Google Assistant so there's no need to touch the remote control. Users can instantly gain hands-free access to their favorite recipes, online videos, streaming apps, music playlists, local TV programming, and smart devices.

Inspired by the trends within home furnishings and kitchen décor, incorporating a minimalistic white bezel surrounding the LCD panel and woven gray mesh cloth covering the powerful dual-speakers that double as the TV stand. Not only does the TV perform well, it also blends perfectly into any kitchen space or décor. The Kitchen Android TV runs Android 8.0 software and is designed with two HDMI ports, dual 8-watt integrated speakers and HD display technology.

Unlike other smart kitchen technology, the Philips 24" Kitchen Android TV can operate as a stand-alone device without the need to mirror or connect to a smart hub to enjoy content. From legacy OTA broadcasting, to popular OTT streaming applications, and the future of voice control, this product is designed to be your kitchen companion.

Magnavox 4K UHD Roku TV

The 4K UHD Magnavox Roku TV features powerful display technology from Funai including HDR10 and runs on the latest Roku OS, offering an intuitive home screen and access to over 500,000 movies and TV episodes. When paired with the powerful display technology from Funai, the 4K UHD Roku TV is the best device for streaming the most popular TV shows and movies.

HDR10 technology provides greater color depth compared to standard dynamic range TVs and improved contrast with peak brightness creating a vivid, bold picture with spectacular clarity. Brilliant Motion Rate (BMR) 120 improves image quality with enhanced refresh rates that reduce motion blur, even during intense, fast-action scenes. The 802.11ac MIMO Wireless LAN chipset delivers bandwidth performance that provides a seamless streaming experience for 4K content.

The Roku OS is very easy to use, offers fast and easy cross channel search with results in order by price. Free content is easy to find with The Roku Channel, which offers award-winners, cult classics, live and linear news, sports and entertainment, and more all without a subscription required. Featured Free provides users with direct links to free in-season episodes from top network shows and full past-season catch-ups. Automatic software updates ensure the TV is always up to date and delivers new features over time. The free Roku mobile app for iOS and Android devices offers a remote, keyboard, voice search, private listening, the ability to cast to any Roku TV and more. software updates, users will have continued access to the latest software technology from Roku, including the new voice-control compatibility update coming in early 2019. This update will allow users to search for content using the Google Assistant with just their voice and offers enhanced volume control with automatic volume leveling.

The 4K UHD Magnavox Roku TV series will be available in Spring 2019.

Product Previews

Funai will be previewing a new Philips 8K TV prototype. 8K is the most cutting-edge resolution technology offering four times as many pixels as 4K displays, resulting in a noticeably clear, high resolution picture that shows off even the smallest of details both up close and from a distance.

Funai will also preview the latest in panel technology with the Philips 65" OLED 4K Android TV featuring HDR 10 and Perfect Motion Rate 120 picture enhancement capabilities. The new OLED 4K Android TV features Wireless LAN 802.11ac with MIMO connectivity for seamless 4K streaming as well Digital Optical out audio capabilities with an added headphone out for private viewing.
