Funai Corporation, Inc. Named Two-Time 2019 CES Innovation Awards Honoree for New Smart Home Products

LAS VEGAS, January 6, 2019 – Funai Corporation, Inc. today announced it has been recognized as a CES Innovation Award Honoree in the Smart Home segment for the Philips 24” Kitchen Android TV and the Funai Nail Art Printer. The CES Innovation Awards is a prestigious program that celebrates the outstanding product design and engineering in new consumer technology products.

The Philips 24” KitchenTV and Funai Nail Art Printer were both named as honorees in the 2019 Smart Home category, which recognizes products and accessories that provide a home’s inhabitants with enhanced comfort, convenience and control.

“Funai has made significant advancements in the smart home technology industry both with its strategic partnerships and product innovation,” says Peter Swinkels, General Manager of Product Planning, Funai Electric Co., Ltd. “We’re proud to receive recognition as a CES 2019 Innovation Awards Honoree and to showcase the innovation, creativity and collaboration that drives our product design.”

The **Philips 24” Kitchen Android TV** is one of the first-of-its-class televisions designed for the heart of every home — the kitchen. The Android TV platform paired with the integrated far-field, echo-cancelling microphone gives users voice-activated access to the Google Assistant so there’s no need to touch the remote control. Users can instantly gain hands-free access to their favorite recipes, online videos, streaming apps, music playlists, local TV programming, and smart devices like [Philips Hue smart lighting](#) from Signify. The compact footprint of the KitchenTV, paired with dual integrated far-field microphones, activates your personal Google Assistant from any place in the kitchen, just say “Hey Google” and instantly gain access to a hands-free experience.

Unlike other smart kitchen displays or tablets, the Philips 24” Kitchen Android TV can operate as a stand-alone device enabling you to download additional apps via Google Play store and connect to other devices via HDMI.

The **Funai Nail Art Printer** makes the frustration of fingernail painting a thing of the past. Using the free smartphone app, users can import photos or select a preloaded pattern to directly print onto their nails in a matter of seconds. With the nail printer, users can achieve salon-quality results at home, and save time and money by skipping a visit to the salon. Users simply import

a photo or select from the pre-installed designs and patterns, then the printer auto-detects the shape of the nail, displays a virtual preview of the design on the nail, and instantly prints. A professional version of the Funai Nail Art Printer will also be available to salons throughout the United States.

Both of these award-winning products from Funai will be on display in the [Innovation Awards Showcase](#) at the upcoming 2019 CES. Attendees can also see both products at CES Unveiled and at the Funai pavilion in the Renaissance Hotel or visit www.funai.us/events-ces2019/ for the latest information. The complete list of CES 2019 Innovation Honorees, including product descriptions and photos, can be found at CES.tech/Innovation.

The CES Innovation Awards are sponsored by the [Consumer Technology Association \(CTA\)TM](#), owner and producer of CES, the world's largest and most influential technology event. CTA has been recognizing achievements in product design and engineering since 1976. [Registration](#) for CES 2019 is open. For the latest news and show announcements, visit CES.tech.

CES 2019 will showcase life-changing technology across every major industry, featuring 4,500 exhibitors across 2.75 million net square feet (260K net square meters) of exhibit space. CES provides access to the very latest transformative tech, such as 5G connectivity, artificial intelligence, augmented and virtual reality, smart home, smart cities, sports tech, machine learning and more.
